Login

Page 1

Page 2

Display a list of  
Workers

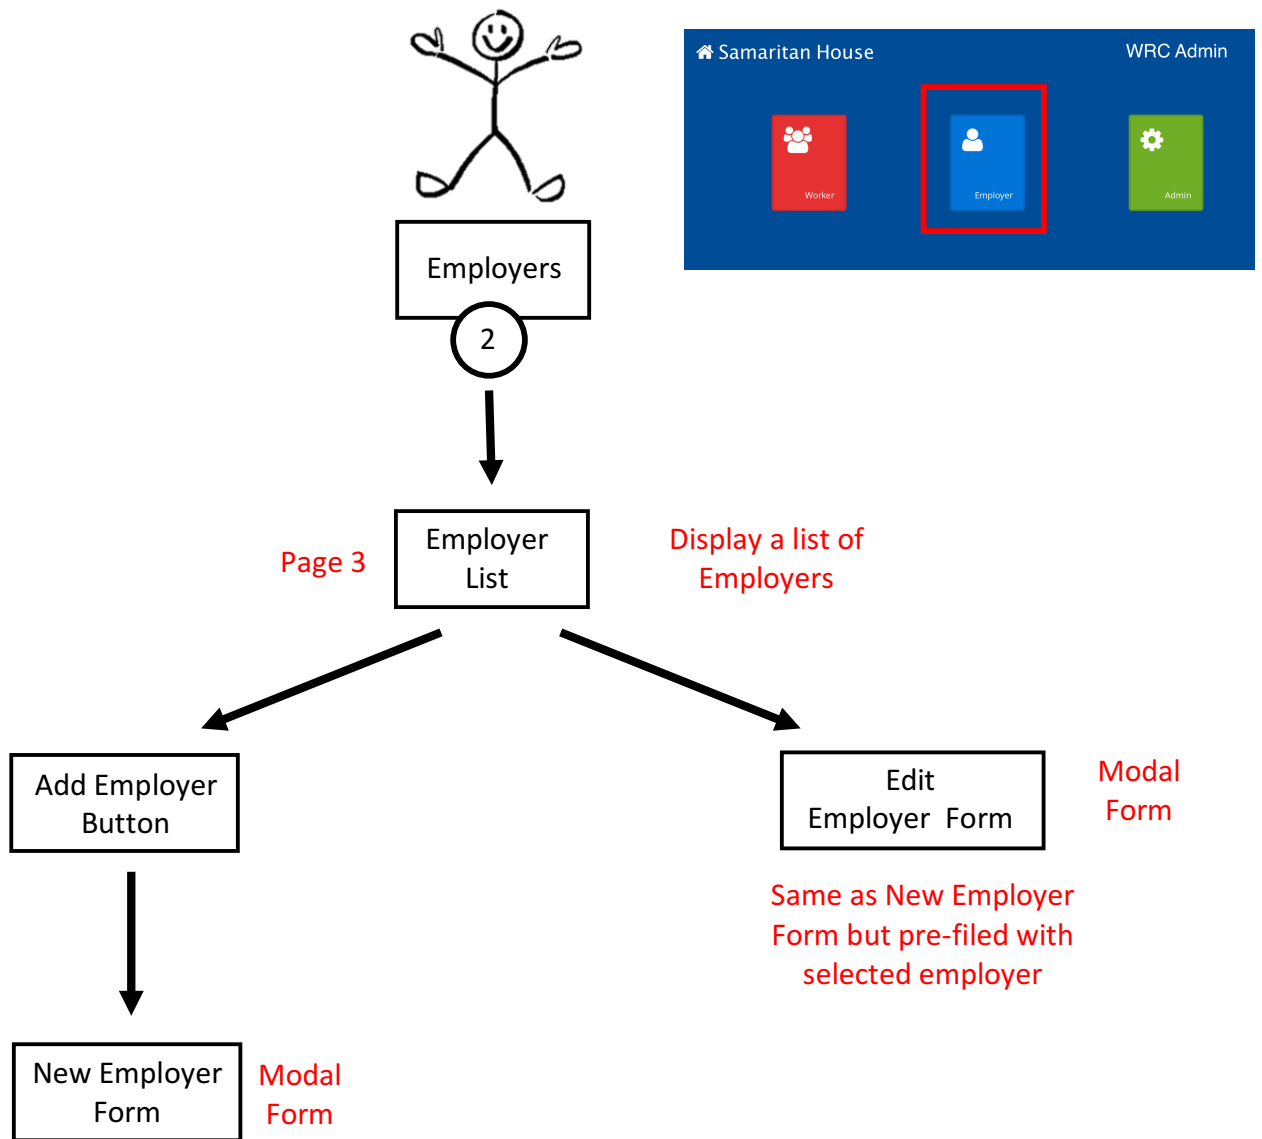

Modal  
Form

Same as New Worker  
Form but pre-filed  
with selected worker

Modal  
Form

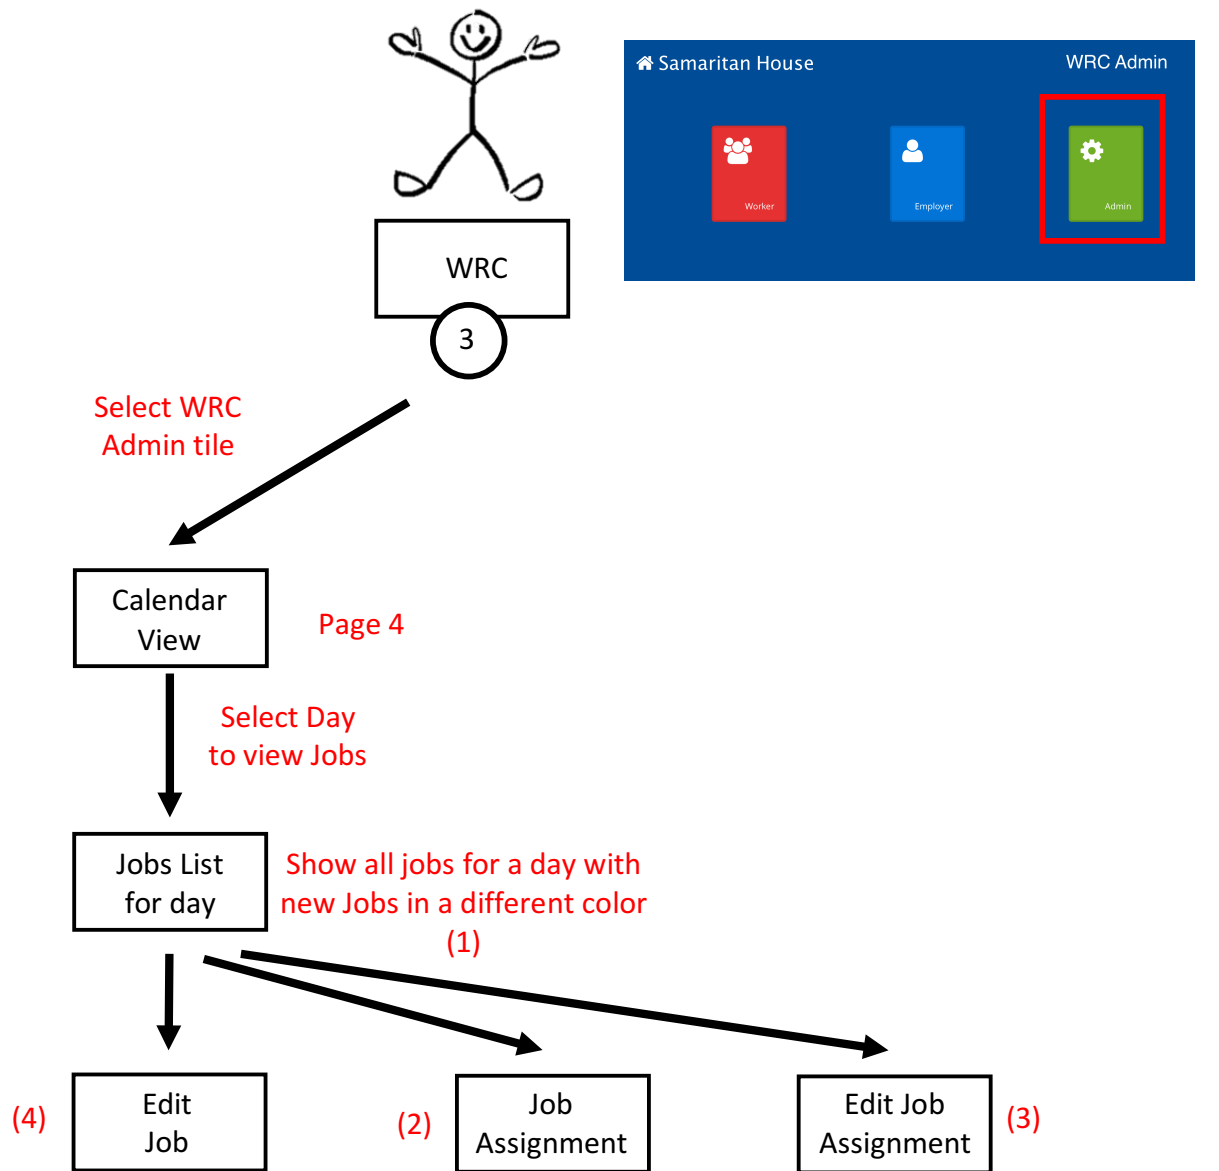

Notes:

Each Page needs a Home button to link back to section A or prev page  
(link the home icon ? ), Consider breadcrumb to aid navigation

#### Notes:

Employers List page should just be a table with the following fields:  
<First Name> <Last Name> <Company> <Phone Number> [Edit link][Authorize][Delete Link]  
Above the table should be Add Employer button  
Authorize should only be present for new employers

#### Notes:

- (1) Show New jobs at top of list (with a different color or background  
<Employer Name> <Job Title> [Assign] [Delete]
- (2) Show Following information for a Job:  
Employer First Name, Last Name, Company Phone Number  
Job Details  
Assign correct number of workers (via drop downs)  
Drop down displays work name organized by skills
- (3) Show same form as (2) but with ability to edit assigned workers.
- (4) Allow the WRC to edit jobs (same form as Employer flow -> edit job)

#### Worker dropdown:

Required Skill: Plumbing  
Bob Jones  
John Smith  
All other workers:  
Jimmy makestuff  
Tim Makey
